

I support limiting the number of media stations a single corporation can own in a local area, even if that results in some economic inefficiencies. The protection of diverse views has value above and beyond market measures of value. The "public interest" is measured by more than simply low prices.

I also request that you extend the comment period on these regulations by 30-days. Very few people I know, who are concerned with this issue, are aware of it.

I also request that you hold another public hearing on this regulation, and that I be notified of the date and location of the hearing.

Thank you.
